PROFESSIONAL SUMMARY

Results-oriented Software Developer with 1.3 years of hands-on experience in full-stack development and cloud infrastructure. Expertise in Python-based backend development using Django and FastAPI, with proficiency in building production-level REST APIs and ETL pipelines. Demonstrated ability in implementing secure authentication systems (SSO, LDAP, JWT), designing scalable applications, and automating workflows with Shell/Bash scripting. Strong foundation in database management (PostgreSQL, MySQL, SQLite). Proven track record of delivering robust applications with a focus on performance optimization, code quality, and leveraging AI tools for task automation and efficiency.

TECHNICAL SKILLS

Programming & Frameworks: Python, Django, FastAPI, Pydantic, Starlette, JavaScript, React, HTML5, CSS3, Bootstrap, Jinja Templates

Databases: SQL, PostgreSQL, MySQL, SQLite

Cloud & DevOps: AWS (S3), Shell/Bash Scripting, Airflow, DAG

Authentication & Security: SSO (Single Sign-On), LDAP, SMTP, OAuth 2.0, JWT, Role-Based Access Control

Tools & Technologies: Git/GitHub, Unix/Linux, SDLC, Agile, REST APIs, AJAX, WebSocket, Data Structures, Grafana, Ubuntu, Nginx, Putty, WinSCP, VSCode, Jupyter Notebook, Zoho, Azure DevOps

PROFESSIONAL EXPERIENCE

Software Developer | TheRapidHire

November 2024 – Present | Indore, India

ZS | *FastAPI, PostgreSQL, Grafana, Azure DevOps*

- Architected and deployed production-level REST APIs for multi-AI integration platform supporting image generation, tabular agents, and multi-LLM functionality
- Implemented memory retention system using Perplexity API, enhancing conversational context and user experience
- Integrated multiple AI models and APIs ensuring seamless communication between microservices
- Monitored API performance and system health using Grafana dashboards, maintaining 99%+ uptime

Optum | *DAG, Shell/Bash Scripting, Putty, WinSCP*

- Automated data workflows and system operations using Shell/Bash scripting, reducing manual intervention by 70%
- Designed and optimized DAG (Directed Acyclic Graph) pipelines for efficient data processing and task orchestration
- Conducted comprehensive end-to-end unit and integration testing, ensuring code quality and system reliability
- Leveraged Putty and WinSCP for secure remote server management and file transfers

P&G Project | *Django, LDAP, SMTP, SSO, Jinja Templates, Nignx*

- Implemented role-based authentication system using Single Sign-On (SSO) for secure access control
- Designed and developed dynamic user interfaces using Django and Jinja templates with responsive design principles
- Integrated LDAP directory service to fetch recipient email lists and manage user authentication
- Configured automated email notification system via SMTP, sending failure alerts to designated recipients

Turing Project | *AI Model Training & Evaluation*

- Doing AI model training and evaluation across multiple platforms including Gemini and ChatGPT
- Analyzed model performance logs and provided quality ratings based on client specifications and requirements

Cloud & DevOps Engineer Trainee | Vector Skill Academy

July 2024 – October 2024 | Indore, India

- Automated data processing workflows using Python scripts and Shell/Bash scripting, reducing manual effort by 70%
- Optimized SQL queries for data retrieval and management, improving database performance by 35%
- Managed Unix/Linux systems including file systems, user management, and permissions configuration
- Deployed and managed cloud infrastructure on AWS (EC2, S3, Lambda, RDS, SNS), optimizing resource utilization
- Implemented version control workflows using Git/GitHub for seamless team collaboration and code reviews

PERSONAL PROJECTS

Pixora - Full-Stack Social Media Application | *React, Django, SQLite, SMTP, WebSocket*

- Developed comprehensive backend architecture for social media platform with user registration, authentication, and profile management
- Implemented complete crud operations for posts, stories (24-hour validity), likes, and comments functionality
- Built real-time chat communication system using WebSocket for instant messaging between users
- Integrated SMTP email service for welcome emails and OTP-based verification system
- Designed secure authorization allowing users to edit/delete only their own content

Quality Governance Dashboard | *Django, SQLite, SMTP, JWT, Jinja Templates*

- Engineered role-based authentication system (User, Approver, Admin, IT) using SSO and JWT tokens
- Developed multi-tier approval workflow where users upload reports for approver validation
- Implemented admin dashboard with comprehensive process monitoring and access log tracking
- Created IT admin panel for role assignment with PassKey authentication and user management
- Configured automatic logout functionality for inactive users to enhance security

Cloud-Based ETL Data Pipeline | *Apache Airflow, PostgreSQL, AWS S3*

- Designed end-to-end ETL pipeline using Apache Airflow for orchestrating data workflows
- Extracted data from PostgreSQL database, performed transformations, and loaded to AWS S3 bucket
- Automated data pipeline scheduling and monitoring for reliable batch processing

EDUCATION

Bachelor of Technology in Computer Science & Engineering (IoT)

Acropolis Institute of Technology and Research, Indore

CGPA: 8.45/10.0 | Graduated: 2024

CERTIFICATIONS & ACHIEVEMENTS

- Published Research Paper: "Online Video Conferencing for AICTE" - Focus on secure real-time communication systems
- Ambassador, AICTE Idea Lab - Led innovation initiatives and mentored students in technology projects
- Student Member, IEEE - Active participation in technical conferences and workshops
- Taekwondo - Demonstrates discipline, dedication, and goal-oriented approach

PROFESSIONAL SKILLS

Adaptability: Quick learner with proven ability to master new technologies and frameworks in fast-paced environments

Problem-Solving: Strong analytical skills with focus on data structures, algorithms, and system design optimization

Communication: Effective collaborator with experience presenting technical solutions to stakeholders and team members
